

MONTREAL.AI

AI / AGI / ASI ENS SOVEREIGN PORTFOLIO

Institutional dossier | Full inventory by strategic layer

Identity -> Proof -> Settlement -> Governance

CROWN ROOTS

agi.eth | asi.eth | mtl.eth | montrealai.eth

PRIME RAILS

agent.agi.eth | node.agi.eth | jobs.agi.eth | ai.agi.eth

CATEGORY KINGS

aiagents.eth | aichat.eth | aibusiness.eth | ainodes.eth

CORE INVENTORY

267 names across 13 strategic layers (+ 27 in appendices)

Document control

Portfolio	AI / AGI / ASI ENS Sovereign Portfolio
Custodian	MONTREAL.AI (AGI King)
Version	4.0
Date	2026-02-13
Scope	Core inventory: 267 names across 13 strategic layers; Appendices: 27 additional names.

Executive summary

This dossier presents a consolidated ENS portfolio built around four crown roots (agi.eth, asi.eth, mtl.eth, montrealai.eth) and a dense lattice of prime rails (agents, nodes, orchestration, tokens, jobs).

The strategic advantage is not only naming scarcity, but activation readiness: the portfolio is structured to become registries, issuance standards, and fee-bearing settlement rails across a network of agents and nodes.

Best-practice posture: treat crown roots and prime rails as non-sellable strategic infrastructure; monetize primarily via subname issuance, renewals, and service fees rather than liquidating core land.

Empire blueprint (one-page model)

Crown Roots	Identity & Issuance	Infrastructure	Economic Rails
agi.eth asi.eth mtl.eth montrealai.eth	agent.agi.eth node.agi.eth ai.agi.eth jobs.agi.eth	ainodes.eth aiorchestrator.eth aginetwork.eth gflownet.eth	agicoins.eth agitoken.eth agifund.eth aidrop.eth

The 5 moves that turn dominant land into economic sovereignty

One canonical portal per crown root. One authoritative gateway per root (agi/asi/mtl/montrealai) with live endpoints and documentation.

Subname constitution and standard. Define what qualifies as an agent / node; verification, expiry, reputation and dispute rules.

Registrar and pricing ladders. Implement a subname registrar with basic -> pro -> enterprise tiers and predictable renewals.

Guarantees via selective fuses (ENSv2 caution). Use wrapper/fuses for trust where reversible; avoid irreversible moves pre-ENSv2.

Public metrics dashboard. Registrations, renewals, active agents/nodes, fees/revenue, resolution counts. This converts story into sovereignty.

Portfolio at a glance

Strategic-layer counts (core inventory + appendices).

Strategic Layer	Count
Sovereign Roots (Crown)	4
Category Kings & Prime Assets	23
Infrastructure & Agent Stack	25
Economic & Settlement Rails	8
Operational Subnames & Rails (AGI)	32
Global Expansion Subnames (AGI)	18
ASI Expansion Subnames	14
Operational Subnames (MTL)	2
Issued IDs (AIAgents)	5
AI Research Ontology	37
Governance & Sovereignty Narrative	39
Institutional & Regional AI Anchors	19
Commercial & Vertical Plays	41
Core inventory (13 layers)	267
Appendices	27
Total scheduled items	294

Crown Jewel Ledger (Top 25)

Scenario-based peak-cycle ETH potential bands (not an appraisal; provided for strategic planning).

Rank	Domain	Rationale	Peak-cycle ETH
1	agi.eth	3-letter AGI root; strongest semantic ownership for on-chain AGI identity.	200-600
2	asi.eth	3-letter ASI root; pairs with AGI to cover the full intelligence arc.	150-500

3	mtl.eth	3-letter geo handle + brand shorthand; extreme scarcity.	60-220
4	montrealai.eth	Institutional brand anchor on Ethereum; reduces impersonation risk.	25-120
5	aiagents.eth	Category king for the AI agents wave; clean, high-intent keyword.	50-200
6	ainodes.eth	Compute + network framing; maps to registries and services.	20-80
7	aiorchestrator.eth	Orchestration layer naming for multi-agent stacks.	15-60
8	agiagent.eth	AGI agent identity primitive; complements aiagents.eth.	15-70
9	aginode.eth	AGI node identity primitive; complements ainodes/aginodes.	12-50
10	aginodes.eth	Plural network framing; monetizable as node registry.	12-55
11	agicoi.eth	Currency rail naming; flexible for exchange/listing narratives.	10-45
12	agitoken.eth	Token rail naming; flexible for staking/utility/credits.	8-40
13	agifund.eth	Finance primitive; credible for treasury/index products.	10-50
14	agicrypto.eth	Broad crypto brand under AGI; umbrella for integrations.	8-35
15	agiconnect.eth	Connectivity primitive; ideal for identity + routing products.	8-30
16	openagi.eth	Memetic and interoperable brand; captures open positioning.	15-70
17	generativeagi.eth	Generative AI -> AGI bridge phrase; strong narrative asset.	8-35
18	gflownet.eth	High-signal research term; academically anchored brand.	8-40
19	reinforcementlearning.eth	Canonical field name; durable institutional term.	10-45

20	naturallanguageprocessing.eth	Canonical field name; long-form but authoritative.	6-25
21	machineintelligence.eth	Civilizational framing; pairs with AGI/ASI narrative.	8-35
22	generalintelligence.eth	Core concept without artificial; broad semantic reach.	8-35
23	artificialgeneralintelligence.eth	Full phrase; maximal descriptive match for AGI.	6-25
24	decentralizedai.eth	Core Web3/AI intersection keyword; policy + product value.	8-35
25	aisupercluster.eth	Ambitious infra metaphor; strong compute/lab network brand.	6-30

Full inventory by strategic layer

The sections below enumerate the complete consolidated inventory (core layers first, then appendices).

Sovereign Roots (Crown)

agi.eth	mtl.eth
asi.eth	montrealai.eth

Category Kings & Prime Assets

aiagents.eth	machineintelligence.eth	decentralizedai.eth
